## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16 and 17, the last three lines are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams in view of Tucker.

Adams discloses the comminuting apparatus substantially as claimed. However, Adams does not disclose a plurality of hard material inserts for the purpose of creating a wear resistant surface. Tucker teaches, in the same field of endeavor, a plurality of hard material inserts in order to create a wear resistant surface.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Adams with a plurality of hard material inserts in order to create a wear resistant surface as taught by Tucker.

Furthermore, the location and/or arrangement of the hard material inserts within the various parts of the impact crusher would have been an obvious matter of design choice absent a showing of criticality by the applicant.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rodriguez et al, Keller et al and EPO '848 are all being cited for showing similar comminuting mechanisms to that of the applicant.
